

Perelman Art

Analysis Sheet Guide

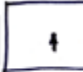

I find this analysis sheet useful when critiquing artwork or planning future projects. After you use it for a while, it will become second nature, but it might be a little tricky at first, so let's go over each question in detail.

Perryman Art

Analysis Sheet

What do you think the artist was trying to communicate? (one sentence)

Overall mood (one word):

Viewpoint: close  medium  far 

Dominance

Line: curved  straight 

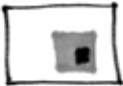

Shape: organic  geometric 

Texture: rough  hard  soft 

Temperature: warm  cool  black and white

Direction: vertical  horizontal  diagonal 

Value Pattern:

What is the center of interest?

How did the artist concentrate interest at this point? (check all that apply)

value contrast color contrast edge contrast placement

size contrast detail contrast direction contrast

Major strength:

Major weakness:

What would you do to fix it?

What do you think the artist was trying to communicate? (One sentence)

Overall mood (one word):

Artists are driven to share their feelings. We want to evoke a response in the people who look at our work. The first two questions help us focus on this. There is no wrong answer to these questions. What is important is how we respond to the image. The questions encourage us to consider the conceptual nature of the work in question and how it might be applied to our own work. With this we have a framework that puts the rest of the questions in context—we can see how the artist was able to use design to express what he wanted to say.

Each of the next set of questions asks you to determine what design characteristic is dominate. This is best explained through examples.

Viewpoint:

close

medium

far

Line:

curved

straight

Shape:

organic

geometric

Texture:

rough

hard

soft

Temperature:

warm

cool

black and white

Direction:

vertical

horizontal

diagonal

This value pattern gradates from light to dark. The gradation can be in any direction—vertical, horizontal, or diagonal, as in this example.

This value pattern uses equal amounts of black, white, and gray. The values can be laid out in a checkerboard pattern, as above, or distributed more unevenly throughout the image as in the example on the next page.

What is the center of interest?

Most of the time we want a distinct area of interest in our pictures. A place that holds our viewer's attention and reveals the important part of our message. This question forces us to consciously identify it.

The next question requires us to investigate the techniques used to create the center of interest. Rarely, if ever, is a single technique used by itself. Generally there are at least two or three. However, to better illustrate these concepts, I will use simple graphics where a single technique is featured. Keep in mind that we create a focal point through contrast—most things will be one thing (for unity) and the center of interest will be the exact opposite.

How did the artist concentrate interest at this point? (check all that apply)

- value contrast
- color contrast
- edge contrast
- placement
- size contrast
- detail contrast
- direction contrast

value contrast

size contrast

color contrast

detail contrast

edge contrast

direction contrast

placement contrast

Major strength:

Major weakness:

What would you do to fix it?

These last three questions force us to evaluate the effectiveness of design decisions and the success of general techniques (drawing, photography, painting, etc.).

Analysis Examples

What do you think the artist was trying to communicate? (one sentence) *serenity of Lilly pond*

Overall mood (one word): *TRANQUIL*

Viewpoint: close medium far

Dominance

Line: curved straight

Shape: organic geometric

Texture: rough hard soft

Temperature: warm cool black and white

Direction: vertical horizontal diagonal

Value Pattern:

What is the center of interest? *flower*

How did the artist concentrate interest at this point? (check all that apply)

value contrast color contrast edge contrast placement

size contrast detail contrast direction contrast

Major strength: *Strong simple shapes*

Major weakness: *flower too sketchy*

What would you do to fix it? *add detail & refine the shapes of the petals*

What do you think the artist was trying to communicate? (one sentence) *The long forgotten past*

Overall mood (one word): *melancholy*

Viewpoint: close far

Dominance

Line: curved straight

Shape: organic geometric

Texture: rough hard soft

Temperature: warm cool black and white

Direction: vertical horizontal diagonal

Value Pattern:

What is the center of interest? *building*

How did the artist concentrate interest at this point? (check all that apply)

value contrast color contrast edge contrast placement

size contrast detail contrast direction contrast

Major strength: *color harmony*

Major weakness: *Center of interest too centered top right*

What would you do to fix it? *emphasize window*

Playful joy of childhood

What do you think the artist was trying to communicate? (one sentence)

Overall mood (one word):

whimsical

Viewpoint: close eye medium person far point

Dominance

Line: curved straight

Shape: organic geometric

Texture: rough hard soft

Temperature: warm cool black and white

Direction: vertical horizontal diagonal

Value Pattern:

What is the center of interest? *not clearly defined*

How did the artist concentrate interest at this point? (check all that apply)

value contrast color contrast edge contrast placement
 size contrast detail contrast direction contrast

Major strength:

*strong value pattern
multiple focal points*

Major weakness:

Pick one and subordinate the rest

What would you do to fix it?

The beauty of the city at night

What do you think the artist was trying to communicate? (one sentence)

Overall mood (one word):

Viewpoint: close medium far

Dominance

Line: curved straight

Shape: organic geometric

Texture: rough hard soft

Temperature: warm cool black and white

Direction: vertical horizontal

Value Pattern:

What is the center of interest? *white rectangle, bottom lower left*

How did the artist concentrate interest at this point? (check all that apply)

value contrast color contrast edge contrast placement

size contrast detail contrast direction contrast

Major strength: *strong direction lines leading to the center of interest*

Major weakness: *boring center of interest*

What would you do to fix it? *add detail, maybe lettering*
